## M&P Shield® M2.0™ Pistol Available with Green Laser

*M&P Shield M2.0 Series Expanded to Include Integrated Crimson Trace® Green Laser*

**SPRINGFIELD, Mass., (December 20, 2017)** – Smith & Wesson Corp. today announced the addition of a new M&P Shield M2.0 pistol with integrated Crimson Trace® green laser to its popular line of M&P Shield polymer pistols. An ideal choice for concealed carry, the new M&P Shield M2.0 pistol with green laser provides confidence and reliable performance, day or night, in a slim, lightweight, and easy-to-carry profile.

Jan Mladek, General Manager of Smith & Wesson® and M&P® brands, said, “When we began developing the M&P Shield M2.0 pistol with an integrated laser, we recognized the importance of delivering to our customers the benefit of integrating the popular Crimson Trace green laser into their concealed carry pistol. Working together with Crimson Trace has allowed us to expand upon the M&P Shield M2.0 platform and offer our customers another innovative concealed carry option.”

Available in 9mm and .40 S&W, the M&P Shield M2.0 pistol with integrated green laser retains familiar M&P pistol operating features, including a slim profile and 18-degree grip angle for a natural point of aim. The M&P Shield M2.0 pistol with integrated green laser has an MSRP of \$549, features two laser modes, ambidextrous laser activation, and the enhanced M2.0 feature set, including a light, crisp trigger and the M2.0 aggressive grip texture for enhanced control.
